SUMMARY

Senior Frontend Engineer with 5+ years of experience designing and delivering high-performance web applications from concept to production. Implemented microfrontend architectures for complex, high-load systems and set up CI/CD pipelines. Improved performance and enhanced UX/UI with a focus on accessibility best practices. Built scalable, component-based web solutions to support long-term maintainability.

EXPERIENCE

Senior Frontend Engineer

June 2024 – Present | 2 yrs

Altium | altium.com

Belgrade, Serbia

- Developed a new microfrontend application from scratch, integrating external systems into our platform to support cross-product functionality used by 3+ teams.
- Launched the project's first microfrontend with integrated GraphQL, laying the foundation for future adoption across the platform.
- Built and integrated a scalable i18n setup, localizing the app into 3+ languages and unlocking access to new markets.
- Introduced a feature-based architecture to improve code structure and scalability in a 100k+ line codebase.

Senior Frontend Engineer

June 2022 – June 2024 | 2.1 yrs

Happy Inc | happy-job.ru

Moscow, Russia

- Led the development of 3 real-time analytics dashboards (React, Vue, TypeScript), contributing to a 14% increase in company income (tracked via subscription revenue uplift).
- Architected 4 interactive report views for 'FeedbackX' using Vue and Pinia, improving clients' survey analysis speed by 20% (measured via in-app telemetry on time-to-insight).
- Advanced platform components with Tailwind CSS, significantly reducing user complaints by delivering targeted UX/UI improvements that enhanced the overall product experience.
- Engineered custom data visualization tools using Chart.js, enabling clients to interpret complex survey data more efficiently and make faster, data-driven decisions.

Frontend Developer

March 2021 – June 2022 | 1.4 yrs

Autodrive Agency | autodrive-agency.ru

Moscow, Russia

- Developed 3 responsive e-commerce shops from scratch using Vue and TypeScript, complete with admin panels, which drove an 18% increase in company revenue (comparing pre- and post-launch sales data).
- Implemented SEO strategies, achieving a performance boost of 10-23% for web applications by using Next.js (measured via Lighthouse performance scores).

Web Developer

September 2019 – March 2021 | 1.7 yrs

Self-employed | nikita-savkin.github.io

Moscow, Russia
